**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1, 2, and 30, drawn to a commutator, classified in class 310, subclass 233.
  - II. Claims 4-21, 31, and 32, drawn to a sensor, classified in class 310, subclass 68B.
  - III. Claims 22, 24, 25, 27, 28, 33, and 34, drawn to a method of making a commutator, classified in class 29, subclass 597.
2. The inventions are distinct, each from the other because of the following reasons: Inventions Group I, II and Group III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made without molding an insulative core in contact with the magnet and the shell.

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group II has separate utility such as any rotary sensor as in a pulley, washing machine, motor vehicle, or counter. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because the molding search required for Group II is not required for Groups I and II, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Kristin L. Johnson on 12/16/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl I.E. Tamai whose telephone number is (703) 305-7066.
